

# Integrated logistic

## for use of biomass energy in Slovakia

**Complex solution for the implementation of biomass heating and establishment of market with wood pellets in Slovakia.**

Integration of fuel production and operation of heating systems based on fuel pellets

- **Building-up of** new pellet plant in Northwest Slovakia
- **Reconstruction and operation of 44 boiler rooms** in schools and public buildings from fossil fuels to wood pellets

**Project created integrated logistics system** of sawdust collection and transport, processing, distribution and sales of wood pellets, heat production and its delivery to the end users, biomass boilers operation and service

**Total project costs** up to 8 million EUR

**With the financial support of**

### Awards

European award **Climate Star 2004**  
International Environmental Price **ÖGUT** in 2001

### The project holder

#### **BIOMASA, Association**

- established in 1999
- leader in biomass utilization in Slovakia
- non-governmental, non-profit organization
- members from public sector

### **BIOMASA activities**

- pellets production and sales
- reconstruction of boiler-rooms into biomass ones
- installation and operation of pellet-fired boilers
- production and sales of heat
- sales of pellet boilers and hearths
  
- biomass promotion in local market
- consulting and information activities
- project development and implementation
